

With the
**PASSENGER ACCESSIBILITY
& SERVICES SYSTEM (PASS)**

**EVERYBODY
CAN CONTROL THEIR
OWN ENVIRONMENT!**

INFLIGHT CANADA'S PASSENGER ACCESSIBILITY & SERVICES SYSTEM

introduces significant accessibility to passengers with disabilities

OUR PASS SYSTEM PUTS ALL SERVICE CONTROLS
Reading & Call Lights + USB Power and now adds functional Air
Vent Controls conveniently located in the armrest of the seat.

- PASS System is built on IFC's existing PSS system for wide-body aircraft flying all over the world.
- PASS System provides passengers with disabilities Dignity and Independence by giving them Individual Control over their personal Comfort and Needs.
- Passengers with disabilities can Access Reading Lights, Flight Attendant Call Light, Air Vent Control & USB power all at their armrest.
- Utilizes Existing Boeing PSU & Airbus PSIU Panels.
- No Seat Box Required.
- Completely Scalable – PASS System can be installed on just 1-2 rows or the entire aircraft.
- No Seat SB or TSO Changes Necessary.
- DO-160G Approved.
- Fast Overnight Installation.

THE PASS SYSTEM, INNOVATIVE AND CREATIVE

IFC PASS System brings all of the PSS functions including Reading Lights & Flight Attendant Call Lights to the seat.

IFC PASS System also brings control of the air vent to the seat – change the rate of air flow and direction. All from the armrest.
