PES/PSS+USB

Let the passengers

enjoy

their travel experience

Even more!

Inflight Canada's Passenger Entertainment and Passenger Services System has the patent protected and unique feature a PCU embedded with USB Power at each passenger place.

This PES/PSS+USB System is economical, adaptable and scalable to any aircraft type as well as any airline specific configuration and will interface with any aircraft and any IFE system. With the PES/PSS+USB System, Customer Airlines will now be able to resolve problems with existing, aging, obsolete and inflexible PES/PSS and CSS systems eliminate increasingly frequent failures of these old systems, reduce weight and all aircraft types can use the same interchangeable system components.

The main features of the PCU are:

- The USB charging port
- The Flight Attendant call button
- The Flight Attendant call reset button
- The Reading Light control button
- The Audio controls
- The key pad back-light
- Intuitive maintenance procedures.
